

BUILDING DOWN BARRIERS INDEX

A.Intro	Section III 2.A. Tools for getting started with a Project
Tool A1	Developing the Strategic brief
Tool A2	Selecting a Prime Contractor
Tool A3	Deriving the historical through life cost baseline
Tool A4	Selecting supply partners for the Project
Tool A5	Setting incentives and share saving schemes
Tool A6	Applying risk Management in practice
B-intro	Section III.2.B Working together to clarify project values
Tool B1	Value Planning in Practice
Tool B2	Drafting the Project Brief
C-intro	Section III.2.C Collaborating in Design and construction
C1-clust	Forming supply clusters and appointing cluster leaders
C2-ve	Value Engineering in Practice
C3design	Collaborating to plan and sequence design activities
C4-tlc	Collecting and Documenting through-live cost data
C5-cost	Getting started with collaborative costing
C6-build	Planning and Managing Construction to optimise programme and minimise waste
C7-induc	Forming new teams and inducting new project members
C8-prove	Proving through life cost: the compliance plan and proving arrangements
D-intro	Section III 2.D. Tools for Assessing project and building performance
D1-outco.	Assessing the products of a Building Project

- D2effect. Assessing Business and Engineering Processes
- Disc-vm Section II.3 Designing using value management
- Disc-ci Section II.4 Implementing Continuous Improvement
- Dis-cost Section II.5 Managing Costs of Ownership
- Disc-inc Section II 6 Setting incentives and shared saving schemes
- Disc-risk Section II.7 Managing Project Risks
- Disc-
eval. Section II.8 Conducting meaningful evaluation of products and processes
- Disc-tra Section II-9 Identifying training needs and planning training

Collaborating for the Built Environment (Be) – www.beonline.co.uk

Be is an independent body formed from a merger of the Reading Construction Forum and the Design Build Foundation in 2002. Its 100 member organisations come from the demand and supply chains of the 'industry formerly known as construction', ranging from public sector and private sector clients and developers to contractors, designers, consultants, specialists and suppliers. It leads research and implementation activities in support of a vision of delivering integrated built environment solutions through collaborative working.

Contact Don Ward (Chief Executive):
