

Social Value Task Group

Renew

CONSTRUCTING EXCELLENCE
in the built environment

How do clients take social value into consideration during procurement and planning ?

What are the best and worst practices of implementing and achieving social value?

How can the industry as a whole best promote the social impact of the built environment?

Renew, in partnership with Constructing Excellence Yorkshire and the Humber, are leading on a national Social Value Task Group to indicate, scrutinise and share best practice in the development, delivery and management of Social Value. The group will offer practical advice and guidance on social value to clients, contractors and central government.

Renew wants to bring leading experts together to develop and deliver the Social Value Task Group.

If you are interested in being become a member of the group please contact rob.wolfe@renew-leeds.co.uk
