PUSHING THE BOUNDARIES OF WHAT IS POSSIBLE IN TODAY'S CONSTRUCTION INDUSTRY.

.....

INDUSTRIALISED CONSTRUCTION transforms the building process by leveraging advanced manufacturing techniques and innovative strategies such as platform design, kit of parts, design for manufacture and assembly (DfMA) and offsite manufacturing. This is bolstered by adopting an Industry 4.0 approach, integrating robotics, augmented and virtual realities, automation, digital tools and connectivity, 'big data' and the Internet of Things, to streamline and improve built environment quality, sustainability and workforce productivity.

As a powerful catalyst for driving real-world transformative change, the UK's only **INDUSTRIALISED CONSTRUCTION CONFERENCE** and **EXHIBITION** stands out as the premier platform for highlighting genuinely groundbreaking solutions and fostering high-impact collaboration towards delivering advanced construction.

The event will spotlight innovations that are making a difference now using next-generation digital technology, and will bring a wide range of industry leaders, policymakers and trailblazers together for bold and thought-provoking discussion on how to redefine the way we build.

INDUSTRIALISED CONSTRUCTION is creating a launchpad for change, revealing how cutting-edge digital tools and manufacturing technology are boosting much needed efficiency and productivity levels and radically streamlining building design and delivery. The event will tackle the sector's biggest challenges and show how Industry 4.0 technologies can also keep up with rapidly evolving building regulations and challenging market demands.

It will be my honour to Chair the first **INDUSTRIALISED CONSTRUCTION CONFERENCE** and to welcome so many of our industry's pioneers to the event in July. We hope that you can join us there.

DARREN RICHARDS

Managing Director –
Cogent Consulting & Conference Chair

CONSTRUCTION TO PRODUCTION

As a powerful catalyst for driving real-world transformative change, the UK's only **INDUSTRIALISED CONSTRUCTION CONFERENCE AND EXHIBITION**, stands out as the premier platform for highlighting genuinely groundbreaking solutions and fostering high-impact collaboration towards delivering advanced construction methods.

UNLOCKING POTENTIAL

Designed to push the boundaries of what is possible in today's construction industry, the **INDUSTRIALISED CONSTRUCTION CONFERENCE** is your front-row seat to hear about the groundbreaking technologies transforming the built environment. With an emphasis on unlocking the full potential of Industry 4.0, the conference will delve deep into the most pressing manufacturing and construction challenges and reveal the transformative solutions reshaping every aspect of the construction arena.

HAPPENING RIGHT NOW

Laying the foundations for a new era of construction, **INDUSTRIALISED CONSTRUCTION** is a forum where technology meets practical applications to leverage change that is already delivering transformational and measurable results across the UK's built environment.

INDUSTRY TRAILBLAZERS

The **INDUSTRIALISED CONSTRUCTION CONFERENCE** is a dynamic platform that brings together industry leaders, policymakers and trailblazers – empowering collaboration and knowledge-sharing at the highest level. The conference plays a pivotal role in driving industry transformation, ensuring that construction projects are not only more sustainable and efficient, but also capable of meeting the demands of a rapidly changing regulatory landscape and demanding marketplace.

THOUGHT PROVOKING

Engage in dynamic, thought-provoking discussions with industry pioneers, academics and innovators who are pushing boundaries to bring about transformative change. Whether you are a seasoned construction professional, interested in technology, or just a newcomer exploring the field, the event will equip you with the knowledge and understanding to keep you ahead of the curve, network with key stakeholders and importantly connect with others in the fast-moving world of industrialised construction.

DEDICATED EXHIBITION

The co-located exhibition gives attendees an exclusive chance to engage directly with the people behind groundbreaking manufacturing technologies and digital tools. Speak face-to-face with those reshaping design, manufacturing, and the construction process. Find out more about how to boost efficiency, productivity, sustainability and cost-effectiveness. The exhibition lets attendees discover real-world solutions that are setting new industry benchmarks now and providing practical solutions to overcome challenges that have plagued the construction industry for decades.

**Learn from 30+ industry thought leaders,
innovators and change-makers, including:**

DAY ONE

INDUSTRIALISED CONSTRUCTION STRATEGY AND CONCEPTS

Andy Barnes - MTC

SESSION 1:

UK Industrialised Construction Strategy

Mike Pitts - Innovate UK

Fergus Harradence - Dept. Bus. Trade

Ron Lang - CLC/AtkinsRéalis

SESSION 2:

DfMA Approaches

Azim Jasat - Autodesk

Wolf Mangelsdorf - Buro Happold

Ben Carlisle - Mott MacDonald

Vaibhav Tyagi - Skanska

Eva Magnisali - Dataform Lab

Charlotte-Frances Garrett - KOPE

SESSION 3:

**Pattern Books, Kit of Parts &
Platform Design**

Jamie Hillier - Akerlof

Richard Crosby - Seismic

Jaimie Johnson MBE - Bryden Wood

Neil Pennell - Land Securities

SESSION 4:

**International Perspectives on
Industrialised Construction**

Roland Sitzberger - Porsche Consulting

Jerker Lessing - Lessing Innovation

Daniel Hall - Tu Delft

Irfan Custovic - PhD Candidate - Tu Delft

DAY TWO

INDUSTRIALISED CONSTRUCTION IN PRACTICE

Keith Waller - HVM Catapult

SESSION 1:

Healthcare

Tom Stocks - The New Hospital Programme – NHS England

Anne Daw - HLM Architects

Mark Griffin - NG Bailey

SESSION 2:

Prisons and Infrastructure

Andrew Dewdney - Kier

Sam Ward - Laing O'Rourke

Dale Sinclair - WSP

Seya Tansill - Bowmer & Kirkland

SESSION 3:

MOD and PBSA

Paul Ruddick - Reds10

SESSION 4:

Residential

Ed Jezeph - Homes England

Helena Lidelow - VBC

Oliver Novakovic - Barratt Redrow

Shaun Weston - British Offsite

Ele George - Elevate

These are among the confirmed speakers providing expert commentary and opinion on how to embrace and accelerate advanced technology within a construction context and adopt a 'construction to production' approach to the built environment.

Join us and be part of the movement to change the future of construction in the UK and beyond.
